

# COMPLEMENTARY COMPETENCY PROGRAMME

## HOW TO AVOID SUBOPTIMAL AND TOXIC ANTIBIOTIC LEVELS IN RENAL DYSFUNCTION

### Learning Outcomes:

At the end of the workshop, the participants will be able to:

- *Assess the kidney function in complicated conditions.*
- *Estimate appropriate initial dose for narrow therapeutic window antibiotics in inpatient conditions.*
- *Adjust the antibiotics maintenance doses to avoid toxic or suboptimal doses.*

Dosage adjustment for narrow therapeutic index antibiotics is a critical skill for each doctor and hospital pharmacist.

Join us to practise this skill and become confident in dosage recommendation upon participation in this workshop.

Date : 3 November 2018 (Saturday)  
Time : 9:00 am to 4:00 pm  
Fee : RM 150 for public  
RM 75 for UCSI students/alumni  
Venue : CA 101, Annex Building,  
UCSI University Kuala Lumpur  
Campus.

Recommended for Physicians,  
Pharmacists and Final Year Pharmacy  
Students
